A TCPView egy Windows program, amely megmutatja a rendszer összes TCP és UDP végpontjának részletes felsorolását, beleértve a helyi és távoli címeket és a TCP kapcsolatok állapotát. Windows Server 2008, Vista és XP rendszereken a TCPView a végpont tulajdonosa is a folyamat nevét jelenti. A TCPView a Netstat program informatívabb és kényelmesen bemutatott részalmazát kínálja, amely a Windows rendszerrel együtt szállítódik. A TCPView letöltés tartalmazza a Tcpsvcon parancsot, amely ugyanazzal a funkcióval rendelkezik.
