Ready.

Ready.

Ez a segédprogram, amely a legátfogóbb ismeretekkel rendelkezik az indítási monitorok automatikus indítási helyeiről, megmutatja, hogy mely programok vannak konfigurálva futtatásra a rendszer indításakor vagy a bejelentkezés során, valamint amikor különféle beépített Windows alkalmazásokat indít, mint például az Internet Explorer, az Explorer és a média játékosok. Ezek a programok és illesztőprogramok tartalmazzák az indítási mappa, a Run, a RunOnce és más rendszerleíró adatbázis kulcsokat. Az Autoruns jelentést készít az Explorer héjbővítményekről, eszköztárakról, böngészősegítő objektumokról, a Winlogon értesítésekről, az automatikus indítási szolgáltatásokról és még sok minden másról. Az automatikus futtatás túlmutat más automatikus indítási segédprogramokon.
